Brightsight helping you deliver cybersecure products to global markets

BUILDING DIGITAL TRUST

brightsight

By SGS

Connected technologies dominate modern life. They optimize the way we work, rest and play, delivering greater efficiencies and improving sustainability. However, these benefits can only be fully realized if software, systems and devices are cybersecure.

Brightsight offers comprehensive cybersecurity training, consultancy and evaluation solutions to help you successfully access target markets with compliant products that mitigate risk and enable market differentiation.
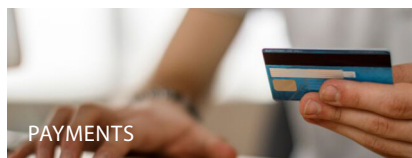

COMPLIANCE DRIVER

Hackers are continually testing the security of our IT systems, undermining trust and increasing risk. Governments and customers are now responding with demands for evidence of product compliance with recognized cybersecurity standards.

In competitive and fast-moving markets, compliance has multiple advantages for manufacturers and developers:

- Expedites market access
- Mitigates risk in the value chain
- Enhances market differentiation

Brightsight – the world's number one security laboratory

We provide high, medium and low assurance security evaluations for a comprehensive range of software applications, systems and devices for multiple industries:

PAYMENTS

AUTOMOTIVE

TELECOMMUNICATIONS

SPACE

GOVERNMENT ID

MEDICAL

INTEGRATED CIRCUIT (IC) MULTIPURPOSE

TOOLS

INDUSTRIAL

INTERNET OF THINGS (IOT)

We work in close collaboration with regulators and certification bodies around the world and hold the largest number of Common Criteria accreditations in the market.
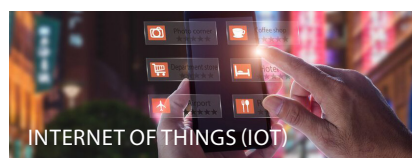

EVALUATION TO CERTIFICATION

We are committed to performing the most efficient security evaluations on the market. We aim the balance the right level of security with the time to market, optimizing the evaluation process so that your can maximize outcomes.

Our phased approach to pre- and formal
security evaluations focuses on reliability
and compliance:

- Scope and documentation
- Design review and code review
- Vulnerability assessment
- Test plan development
- Test plan execution
- Reporting

We operate 55+ laboratory setups, covering the full range of security evaluation criteria – side channel analysis, perturbation attacks, reverse engineering & physical attacks, and IT vulnerability analysis.

We hold the large range of Common Criteria accreditations on the market and can support evaluations against the full range – EAL 1 to EAL 7+.
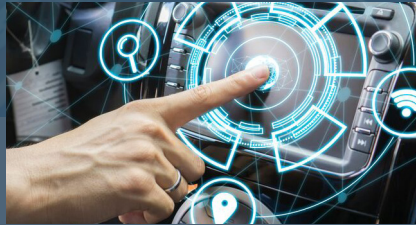

FROM DEVELOPMENT TO AFTERCARE
We support you with solutions that cover the complete product life cycle:

Pre-evaluation
- Workshops/training
  - Awareness training
  - Secure product development and testing
- Developer support
- Pre-evaluation
  - Technical system development life cycle (SDLC) advice
  - Evidence readiness

Security evaluation
Assessment:
- Services
  - Ad hoc
  - Conformance testing
  - Compliance
  - In dept testing

Post-evaluation
- Continuous monitoring
- Continuous conformance

Work with Brightsight

Brightsight joined the SGS Group – the world's leading testing, inspection and certification company – in 2021. With over 35 years of experience, and a growing global network of state-of-the-art laboratories, we provide comprehensive training, consultancy and evaluation solutions to operators in all industry sectors.

Our experts understand your product and the markets you wish to target. We focus on reliability and transparency, helping you to minimize risk while optimizing outcomes in your value chain.

We operate 55+ laboratory setups, employ 170+ specialist security evaluators, and perform 700+ evaluations a year – making Brightsight the number one independent security evaluation service provider in the world.
